Basic Operation

1. Power on

A. Push up battery buckle,remove the battery ,toggle the metal cap of the UIM card slot to the left side, turn up the metal cap and put in the UIM Card,then press the metal cap down tightly and toggle it to the right side in order to tighten the UIM card.

B. Put the battery in and turn the volume switch clockwise to power on.

C. Blue light flashing, voice prompting: "Welcome to use the digital public network walkie talkie", "Power Level", and "Searching network, please wait".

D. Network searching and displays on the LCD screen. Network intensity is divided into five levels: excellent network, good network, poor network, poorer network and no network.

E. Log in the user's account.

   a. Voice prompt: "Log in, please wait", please wait for 20 seconds.

   b. After loging in normally, voice prompt: ＜user name＞, " log in successfully", "entering group", ＜current group name＞.

F. Get group information.

   a. If there is the default group, then it will enter the group automatically after power on, and voice prompt the group name.

   b. If there is not the default group, the voice will prompt "enter the choosing group mode", then it will enter a group Randomly.

   c. When it does not enter any group, it can not login because of there is not group information. Besides, the voice will prompt "No group information" repeatedly.

G. Power on completely.

   No blue light means it finished booting. Communication and other operations are available now.

2. Power off

Turn the volume switch anticlockwise to power off. The whole process needs about 5 seconds. The red light will keep on in the 5 seconds and LCD screen displays a shutdown picture means it is shutting down.

※Please remove the battery after the red light and the LCD screen off, otherwise it will lead to the data loss or harm the walkie talkie.

3. Transmitting

When you press the PPT button and the red light flashes, it enters transmitting mode and the others will hear you.

If there is an advanced user starts to talk when you are transmitting, you will exit the transmitting mode and enter the receiving mode. Now you can only receive passively and the other can not hear you. If you keep pressing the PTT button, you will enter the transmitting mode directly after the advanced user finish transmitting.

When it is in the transmitting mode, the LCD screen will display that "Native walkie talkie is speaking".

4. Receiving

When the blue light turns on means receiving.

It will exit receiving mode when the the two following reasons occurs:

If the priority of native walkie talkie is higher over the other's priority, it will enter the transmitting mode after pressing the PTT Button.

When it is in the receiving mode, the LCD screen will display that "the other's user name".

5. Group Switching

A. Press "MENU" key into the list and enter the "choosing

group" list.

    B. Short press "▲" and "▼", choose the group you want to use.

    C. Press "MENU" key into the group, then press "OK" key into and check the group member list. (It will voice prompt "Enter <group name>")

NOTE: lf the voice prompt does not end, there is no reaction after pressing the PTT button. You should wait for its ending to enter the group with pressing the PTT button.

6. Selective Call

A. There are two kinds of selective call way: group selective call and members selective call.

B. Group members: it needs set up the function of showing group member list for the new members in the background of Corget when users use this way because the limited memory of walkie talkie. By this way, it can not store more than 200 members in each group and each member can't add in more than 64 groups. Otherwise, the walkie-talkie can not operate normally.

C. Friends list: it should be set up in the background of Corget (it can set up a maximum of 200 members). What's more, the function can be used after it is ticked. If the native walkie talkie wants to make selective call the others, you should add the others' accounts and vice versa.

D. Take the example of group list, the following part is the usage.(This usage is the same as the group members. Only the background setting is different.)

E. Press "MENU" key into the list and enter the "choosing group" list.

F. Short press "▲" and "▼", choose the group you want to use.

G. Press "OK" key into the group

H. Short press "▼" and "▼" to choose the group where the one you want to talk alone. Then press "OK" key into the group to check the group members.

I. Short press "▲" and "▼" to choose the one you want to talk alone in the group. (You only can choose the online users with blue portrait. The offline users with gray portrait can not be made selective call.)

J. Press "MENU" key to build up the temporary group after confirmation. The voice will prompt "temporary group <native user name>".

K. After talking, press "BACK" key for one second then it can back to the default group. And the walkie talkie will prompt "exit selective call, <default group name>."

NOTE: only the online users (the one is power on and land in successfully)can use the selective call.
