Talkpod A50P “Meshing” Radios Price List

The Talkpod A50P is a general purpose business walkie talkie with a remarkable extra feature – a group of these radios can “mesh” together to form a self-organising network where each walkie talkie can relay messages to and from other radios in the group. This can very significantly increase the overall range and coverage of a mid to large group of these radios used together.

Product Details		Price (ex VAT)
